SUMMARY

AI & Data Science enthusiast with a strong foundation in programming, data analysis, and machine learning. Third-year **BSCS** student at **DUET**, passionate about developing AI-driven applications and automation systems. Skilled in Python, SQL, Power BI, and Machine Learning frameworks with a commitment to continuous learning and building intelligent, data-powered solutions.

EDUCATION

Bachelor of Science in Computer Science

Dawood University of Engineering & Technology, Karachi (2023 – Present)

Relevant Coursework:

Data Structures & Algorithms, Artificial Intelligence, Database Systems, Object-Oriented Programming, Operating Systems, Computer Networks, Web development

Intermediate in Pre-Engineering

Khatoon-e-Pakistan, Government College for Women, Karachi
2020 – 2022

FOCUS SUBJECTS

Artificial Intelligence	Data Science
Database Management Systems	Object Oriented Programming
Data Structures and Algorithms	

TECHNICAL SKILLS

Programming & Development: Python, C++, Java, HTML, CSS, JavaScript, Bootstrap, SQL

AI & Machine Learning: Scikit-learn, NumPy, Pandas, [TensorFlow, Flask, Django, FastApi, PyTorch (Learning)]

Data Analytics & Visualization: Power BI, Excel, Looker Studio, Matplotlib, Seaborn

Database Management: MySQL, PostgreSQL, Oracle, MongoDB

Tools & Platforms: Jupyter Notebook, Google Colab, Git/GitHub, Figma, VS Code, PyCharm

Other Skills: Data Cleaning & Analysis, Data Visualisation, Feature Engineering, Model Evaluation, API Integration, Web Scraping

EXPERIENCE

Data Science & Analytics Virtual Internship

DevelopersHub Corporation (Virtual) (May 2025 – Jun 2025)

Explored datasets for business intelligence and trend forecasting. Developed reports using Power BI and Python. Enhanced analytical, teamwork, and reporting skills under real-world project conditions.

AI-Powered Data Insights Virtual Internship

Excelebrate (Remote) (Jul 2025 – Aug 2025)

Conducted data cleaning, preprocessing, Churn Analysis and visualization using Python (NumPy, Pandas, Matplotlib, Looker Studio). Collaborated with a remote team to deliver AI-based insights.

PROJECTS (ON GITHUB)

Hidayah: Complete AI-based Islamic Web App *(Python - Streamlit)*

Practiced data extraction, using request, cleaning, and transformation. Strengthened experience on real-world API integration, NLP-based Quran analysis, and deployed it on Streamlit.

AI- Model training and Organizational Insights Dashboard *(Python, PowerBi & PostgreSQL - Google Collab)*

Built an analytics dashboard using Power BI and Python for KPI visualization at the end of my Excelebrate internship to present overall report to the management.

Customer Segmentation Using Machine Learning *(Python - Jupyter Notebook)*

Clustered customer data using K-Means and Elbow Method and visualized results for marketing strategy optimization along with my classmates in university project.

Library Management System *(Java & MySQL - NetBeans)*

Designed a system to manage book records and user transactions with database connectivity. Made along with my classmates in university project.

Online Cinema Booking System *(C++ & MySQL - Qt Creator)*

Created a GUI-based movie reservation system with seat selection and billing features. Made along with my classmates in university project.

CERTIFICATIONS

Master Python Programming – Udemy

Advanced Data Analytics – Coursera

Artificial Intelligence – Nvttac Pakistan (Ongoing)
